BILLING CODE 1410-31-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Submission of Proposed Information Collections to OMB

AGENCY: National Archives and Records Administration.

ACTION: Notice of proposed information collections submitted to OMB for approval.

SUMMARY: The National Archives and Records Administration (NARA) is giving notice that the proposed collections of information described in this notice have been submitted to the Office of Management and Budget for approval under the Paperwork Reduction Act and 5 CFR part 1320. Public comment is invited on these collections.

DATES: Comments should be submitted by August 14, 1995.

ADDRESSES: Copies of the proposed information collections and supporting documentation can be obtained from the Policy and Planning Division (PIRM-POL), 8601 Adelphi Road, Room 3200, College Park, MD 20740-6001. Telephone requests may be made to (301) 713-6730, extension 226.

Written comments should be sent to Director, Policy and Planning Division (PIRM-POL), National Archives and Records Administration, 8601 Adelphi Road, Room 3200, College Park, MD 20740-6001. A copy of the comments should be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for NARA, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Mary Ann Hadyka or Nancy Allard at (301) 713-6730.

The following proposed information collections have been submitted to OMB:

1. National Archives Order for Copies of Veterans Records (NATF Form 80).

Description: The information collection is a form used to request a search for and place an order for copies of military service files, pension application files, and bounty land files more than 75 years old in the custody of the National Archives.

Purpose: The information is used to search for the requested file and, if found, make copies and bill the respondent for them; or to notify the respondent of unsuccessful searches.

Frequency of response: On occasion.

Number of respondents: 100,000.

Reporting hours per response: 10 minutes.

Annual reporting burden hours: 16,667 hours.

2. National Archives Order for Copies of Ship Passenger Arrival Records (NATF Form 81).

Description: The information collection is a form used to request a search for and place an order for copies of pages from ship passenger arrival files in the custody of the National Archives.

Purpose: The information is used to search for the requested file and, if found, make copies and bill the respondent for them; or to notify the respondent of unsuccessful searches.

Frequency of response: On occasion.

Number of respondents: 10,000.

Reporting hours per response: 10 minutes.

Annual reporting burden hours: 1,667 hours.

3. National Archives Order for Copies of Census Records (NATF Form 82).

Description: The information collection is a form used to request a search for and place an order for copies of pages from population census records in the custody of the National Archives.

Purpose: The information is used to search for the requested file and, if found, make copies and bill the respondent for them; or to notify the respondent of unsuccessful searches.

Frequency of response: On occasion.

Number of respondents: 14,000.

Reporting hours per response: 10 minutes.

Annual reporting burden hours: 2,333 hours.

4. National Archives Order for Copies of Eastern Cherokee Applications (NATF Form 83).

Description: The information collection is a form used to request a search for and place an order for copies of Eastern Cherokee applications to the U.S. Court of Claims, 1906-1909 in the custody of the National Archives.

Purpose: The information is used to search for the requested file and, if found, make copies and bill the respondent of unsuccessful searches.

Frequency of response: On occasion.

Number of respondents: 600.

Reporting hours per response: 10 minutes.

Annual reporting burden hours: 100 hours.

5. Request for and Record of Pass (NA Form 6006).

Description: The information collection is a form used by NARA volunteers and contractor employees to obtain a NARA building pass.

Purpose: The information is used to provide a record of individuals who are issued a NARA building pass. The building pass is part of NARA's facility security program.

Frequency of response: On occasion. Contractors and volunteers must complete the form when they begin their employment or volunteer service at a NARA facility and when their building pass expires if there are significant changes to the information provided initially. Contractor passes expire annually; volunteer passes expire after 5 years.

Number of respondents: 1,266.

Reporting hours per response: 3 minutes

Annual reporting burden hours: 64 hours

6. Request Pertaining to Military Records (SF 180); Questionnaire about Military Service (NA Form 13075).

Description: The information collection is the information that must be provided when requesting information from or copies of documents from a military service record stored at the National Personnel Records Center (NPRC) to allow NPRC to locate the record and respond to the request. Standard Form 180 is the principal form used to obtain information but other forms and letters may be used. NA Form 13075 is a supplemental form furnished to approximately 10 percent of the respondents to obtain additional information to search alternative sources to supply the requested information.

Purpose: The information is used to locate the requested record and to determine the releasability of the record under Department of Defense rules.

Frequency of response: On occasion.

Number of respondents: 713,400.

Reporting hours per response: 5 to 30 minutes.

Annual reporting burden hours: 209,616 hours.

7. Automated researcher application.

Description: The information collection is a researcher application form completed by individuals who wish to use original records in the National Archives, a regional archives, or a Presidential Library operated by NARA. The paper application form (NA Forms 14003 and 14003A) has been approved by OMB under control number 3095-0016. This submission is to request approval of an automated researcher application which will replace the paper version.

The automated researcher application is currently available in the College Park, MD National Archives facility; its use will be expanded to the other locations over the next 24 months.

Purpose: The information is used by NARA as a security measure to screen individuals who will have access to original records, to identify which types

of records the individual should use, and to allow further contact with the individual if additional records of interest are found or if problems with the records are discovered.

Frequency of response: Every three years at the National Archives and regional archives facilities; annually at Presidential libraries until the automated application is in use. More than 90 percent of respondents complete the form only one time.

Number of respondents: 30,000.

Reporting hours per response: 8 minutes.

Annual reporting burden hours: 4,000 hours.

8. Item Approval Request List.

Description: The information collection is a form used to order reproductions of motion picture, audio, and video holdings in the custody of the Office of the National Archives.

Purpose: The information is used by NARA to verify the availability of the requested items for reproduction and, when returned by the vendor, for pulling the copying masters for reproduction.

Frequency of response: On occasion.

Number of respondents: 1,500.

Reporting hours per response: 15 minutes.

Annual reporting burden hours: 375 hours.

Dated: June 22, 1995.

John W. Carlin,

Archivist of the United States.

BILLING CODE 7515-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-295]

Commonwealth Edison Company; Zion Nuclear Power Station, Unit 1; Environmental Assessment and Findings of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption to Facility Operating License No. DPR-39, issued to Commonwealth Edison Company (the licensee), for operation of Zion Nuclear Power Station, Unit No. 1, located in Lake County, Illinois.

Environmental Assessment

Identification of the Proposed Action

This Environmental Assessment has been prepared to address potential environmental issues related to the licensee's application dated May 12, 1995. The proposed action would

exempt the licensee from the requirements of 10 CFR Part 50, Appendix J, Paragraph III.D.1.(a), to the extent that a one-time schedular extension would permit rescheduling of the next Type A test for Zion Nuclear Power Station, Unit 1, to the refueling outage currently scheduled to start in March 1997. Appendix J is undergoing revisions and if the revised Appendix J requirements are approved and issued prior to the March 1997 refueling outage, the next Unit 1 Type A test will be performed in accordance with the revised requirements.

The Need for the Proposed Action

The current containment integrated leakage rate testing requirements, pursuant to 10 CFR Part 50, Appendix J, Section III.D.1.(a), are that after the preoperational leak rate test, a set of three Type A tests must be performed at approximately equal intervals during each 10-year inservice inspection period. Furthermore, the third test of each set must be conducted when the plant is shut down for the 10-year inservice inspection. The most recent Type A test was conducted in March 1992, approximately 40 months ago. On March 31, 1993, Zion, Unit 1, was granted an exemption from the requirement of 10 CFR Part 50, Appendix J, that the third Type A test for the second 10 year inservice inspection interval be conducted while shutdown for the 10 year inservice inspections. That one-time exemption effectively decoupled the Type A testing frequency from the 10 year inservice inspection interval and allowed the next Type A test to be scheduled independent of the end of the second 10 year interval. As a result of that exemption, Zion Unit 1 was to perform its next Type A test during the September 1995 refueling outage (RFO). The exemption is needed to allow a longer interval between the Zion, Unit 1, Type A tests, which will result in a considerable cost-savings to the licensee.

Environmental Impacts of the Proposed Action

The proposed one-time exemption would not increase the probability or consequences of accidents previously analyzed that affect facility radiation levels or facility radiological effluents. The licensee has analyzed the results of previous Type A tests performed at Zion Nuclear Power Station, Unit 1, and has provided an acceptable basis for concluding that, with the proposed one-time extension of the Type A test interval, the containment leakage rates will still be maintained within
